

We supply life science and diagnostic reagents for research purposes

we Connect *you*

Over the past 17 years, we have worked on a network that connects every type of laboratory in the Benelux with reagent manufacturers from all over the world. Our comprehensive portfolio contains reagents for drug discovery and large scale production, as well as specialized niche products. Besides the products in our portfolio, we are able to arrange custom production of products that suit your needs. Our offices are located in Huissen, the Netherlands, and Brussels, Belgium.

Why you choose us?

- ✓ *Extensive network of global contracted suppliers*
- ✓ *Preferred supplier in the academic and industrial market*
- ✓ *In-house advanced technical knowledge and practical expertise*
- ✓ *Everything you need at one address*

Lets work together!

- ✓ *Bio-Connect supports you in Dutch, English and French*
- ✓ *If you cannot disclose your needs without an NDA, we are very willing to set one up*
- ✓ *ISO 9001:2015 and ISO 14001:2015 certified*
- ✓ *More time for your own R&D activities*

**Experience our services for yourself and receive a special offer on first order.
Take a look at our suppliers and what they can offer you!**

	Drug discovery	Cell-based treatments	Vaccine development	Production of i.e. drugs, proteins	(Diagnostic) Kit production	Food, feed & seeds	Portfolio and USP's
Cygnus Technologies	x		x	x			Bioprocess impurities: protein A ELISA and HCP ELISA (i.e. CHO and HEK293), custom kits and coverage analysis services
Sino Biological	x		x		x		Recombinant technology: proteins, antibodies, custom production
PromoCell	x		x	x	x	x	Cell culture: primary cells with specialized culture media (custom), cell assays, EXCiPACT™ GMP certified
AdipoGen Life Sciences	x		x		x	x	Inflammation research: antibodies, ELISA, recombinant proteins, small molecules, natural products and rare antibiotics
Bio X Cell	x		x		x		<i>In vivo</i> grade monoclonal antibodies: preclinical animal studies, bulk quantities
GeneTex	x		x		x	x	Polyclonal, monoclonal and recombinant antibodies: cancer, infectious disease, neuroscience, 5 pillars of antibody validation
BPS Bioscience	x		x		x		Biomedical research: cell lines, proteins & enzymes, substrates, immunotherapy, epigenetics, cell signaling, CRISPR, CAR-T
Atlas Antibodies	x						Antibodies from the Human Protein Atlas project: Best in class for IHC, co-development program
MedChem Express	x				x	x	Small molecules: research chemicals and biochemicals, biologically active, synthesis from milligrams to kilograms, FDA approved bioactive screening libraries (HTS/HCS)
Solis BioDyne	x				x	x	PCR reagents: enzyme is stable at RT and tolerates inhibitors, FAST range allows 30 min (q)PCRs
SVAR Life Science	x	x		x	x		Gene therapy-, complement system-, cell-based solutions, with the iLite Technology
Quidel	x				x		Immunsystem monitoring, complement activation, bone health
Mabtech	x		x	x	x		Spot technology for studying immune response in diseases
Creative	x	x	x	x	x		GMP proteins, CAR-T, customized solutions, gene discovery, regulation and function, cell based assays, custom service provider
IBL	x		x			x	ELISA and ready-to-use assays for specific markers/hormones/antibodies/antigens
BioLamina	x	x	x	x	x	x	Laminins: matrices for robust expansion, maintenance and differentiation of cells, 2D and 3D culture
Biotium	x				x		Fluorescent tools: patented technologies and solutions for unmet challenges, earth-friendly alternatives
BrainXell	x						iPSC derived neurons: highly pure cultures of neurons
Cell Guidance Systems	x				x		Exosome research: extraction of extracellular vesicles without centrifugation, 3D cell culture: PODS-peptigels with growth factor depots, softwell plates and dishes
FUJIFILM Wako Chemicals	x		x			x	Safety testing: endotoxin-specific testing (LAL/SLP), DADRA/ADRA test: animal-free skin sensitivity testing, Bambanker: serum-free cell freezing medium
Prolytix (HTI)	x				x		Large molecule CRO: protein chemistry expertise, integrated large molecule analytical services and customized products
LifeSpan BioSciences	x		x		x	x	Biomedical research reagents: antibodies, ELISA and assay kits, proteins, IHC, cancer, infectious disease (virology), pathways
OZ Biosciences	x	x	x	x			Transfection reagents: magnetic transfection of DNA, RNA, protein or virus, mRNA range
INDIGO Biosciences	x					x	Nuclear receptor assays: <i>in vitro</i> toxicology studies
Cell4Pharma	x		x			x	Renal toxicity test: ciPTEC, a human renal cell line, reduced drug development losses
Jackson ImmunoResearch	x				x		Secondary antibodies: original manufacturer of secondary antibodies, also produce blocking serum, control proteins and streptavidin and conjugates
JPT peptides	x	x	x	x			Peptides: PepMix to check T-cell response, SARS-CoV-2 peptides, special peptide synthesis and customized medchem
PolyAn	x				x		Modification of surfaces (custom): micro- and nanoparticles (beads), microarray slides, reactive microplates
