

DISEASED DONOR MATERIALS FOR CELL AND GENE THERAPY DEVELOPMENT

OrganaBio provides ethically sourced adult leukapheresis products and birth tissues, from a diverse and engaged donor pool, including leukopak, PBMCs, T cells, NK cells, placenta, umbilical cord, umbilical cord blood, HSCs, and a variety of immune cells. All products are manufactured to enable the development and delivery of innovative cell and gene therapies and vaccines.

OrganaBio's donor pool now includes donors with over 200 indications.

LeukoPAC™ Products include leukopaks and isolated cells (PBMC, NK and T cells).
